

Medical Report

Patient Name: Alex Smith

Date of Examination: October 5, 2023

Report Prepared By: Dr. Jane Smith, MD

Facility: XYZ Medical Center

Chief Complaint:

Patient was involved in a motorcycle accident. Reports minor injuries and mild discomfort. No loss of consciousness.

History of Present Illness:

The impact was not severe, but the patient sustained minor injuries. He was able to walk and remained alert throughout.

Physical Examination:

- **General:** Alert, oriented, and in no acute distress.
- **Head:** No visible trauma, no dizziness or headache reported.
- **Neck:** No tenderness or restricted movement.
- **Upper Extremities:** Mild abrasions on the right forearm, no fractures or deformities noted. Full range of motion preserved.
- **Lower Extremities:** Mild contusion on the right knee, no swelling or instability.
- **Skin:** Superficial abrasions on the right elbow and knee, no signs of deep lacerations or infection.

Assessment:

1. Superficial abrasions on the right forearm and knee.
2. Mild contusion on the right knee.
3. No evidence of fractures, head trauma, or internal injuries.

Plan:

- Clean and dress superficial wounds.
- Prescribe analgesics for mild pain as needed.
- Advise rest and cold compress for knee contusion.
- Monitor for any delayed symptoms such as swelling, dizziness, or persistent pain.
- Follow-up in 3-5 days if symptoms persist.

Disposition: Patient discharged in stable condition with home care instructions.

Physician's Signature:
